PICORETT

THE FEEDER OF REFERENCE FOR A SUCCESSFULL START

Essential extension to classic automatic feeders

- Picorett is used in addition to automatic feeder lines when starting poultry because 2 times more feeding points are necessary at this age
- Picorett distributes from the 1st day on an accessible feed which is not soiled by chicks
- Picorett prevents one-day-olds from penetrating into the pan, allowing 20 chicks to have access at the same time to the feed, that is to say twice as much as with a classic automatic feeder

Easy and precise setting

- Easy and precise setting due to one central screw
- Lid to prevent the birds from jumping into the feed reserve
- Base to raise Picorett in order to adapt to the growth of the birds and to avoid litter projections inside the feed
- Anti-wasting grille to adapt to guinea fowls and quails

Flock performances improved right from the beginning

- Better hygiene of feed is gained because chicks are not able to penetrate into the pan preventing hereby manure droppings
- Optimal feed accessibility because one-day-olds cannot nest inside the pan
- Permanent distribution of clean feed with a reserve of 12,5 liters
- Recommended by professionals to manage a good start

Technical characteristics

Highly resistant plastic assures strength

- **Pan** : diam 32 cm, depth 4,2 cm
- **Reserve** : 12,5 L

ACCESSORIES :

- Lid for turkeys, guinea fowls and quails
- Grille for guinea fowls and quails
- Base to heighten : + 5 cm
