# FEED BINS

## FEED STORAGE FOR LIVESTOCK BUILDINGS

### Good feed flow

- The corrugated design facilitates feed flow
- The hopper angles of 57°, 60° or 67° as well as the unobstructed interior allows for easy feed flow

### Feed preservation

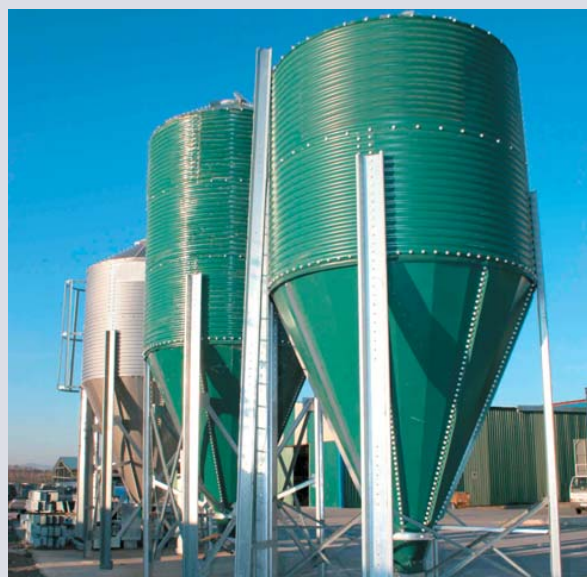

- The galvanised or pre-coated corrugated sheets reflect the sun rays and reduce heat
- The limitation of temperature variation contribute to a better feed quality

### Durable and resistant

- Quality material for better resistance to wind and corrosion
- Plastified bolts prevent corrosion

### Wide size range

- Extensive choice in diameters and hopper angles
- Straight or sloped cone
- Pneumatic or mechanically filling
