FLEX AUGER

FEED SYSTEM

FOR A RELIABLE LONG-LASTING DELIVERY

AN EFFICIENT DELIVERY SYSTEM

Fast feed transit toward the animals.

Hopper silo with single or double exit, straight or 30°.

Round head screw in the cone.

WIDE RANGE

3 standard products (Ø60, Ø90 and Ø125)

► for various transport capacity.

Hopper base for 1 or 2 exit.

Direct power drive with gear-box sized for each application

► depending of the diameter of the auger, the number of bends and the total length of the system.

Flexible, rigid or telescopic drop tubes

► easy feed delivery to the animals.

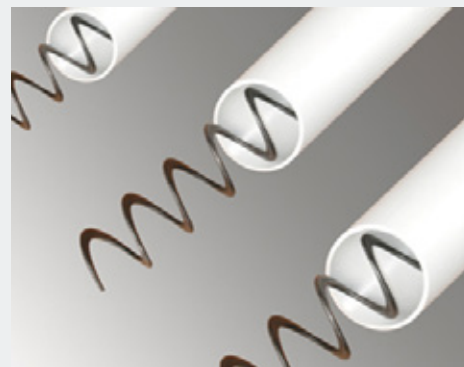

STRONG AND RELIABLE MATERIAL

Slotted and sleeved tubes and bends with clamps.

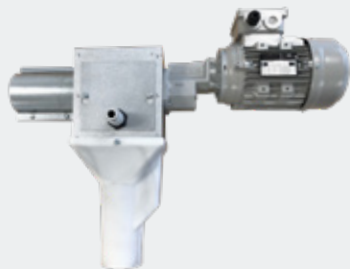

Spiral made of highly wear-resistant materials.

Longer installations with bends must be equipped with an intermediate base and an additional control unit.

EFFICIENT AUTOMATION

Automatic control with integrated anti-jamming device.

TECHNICAL CHARACTERISTICS

- Thick PVC pipe: Ø60, Ø90 and Ø125 mm external.
- Power drive unit of 0.55 kw, 1.1 kw et 1.5 kw.
- Various capacities from 450kg/h to 4000kg/h depending on the applications.
